

OldMovie

Post Effect for Unity Urp and VolFx by **NullTale** + + ✨
Quick Guide

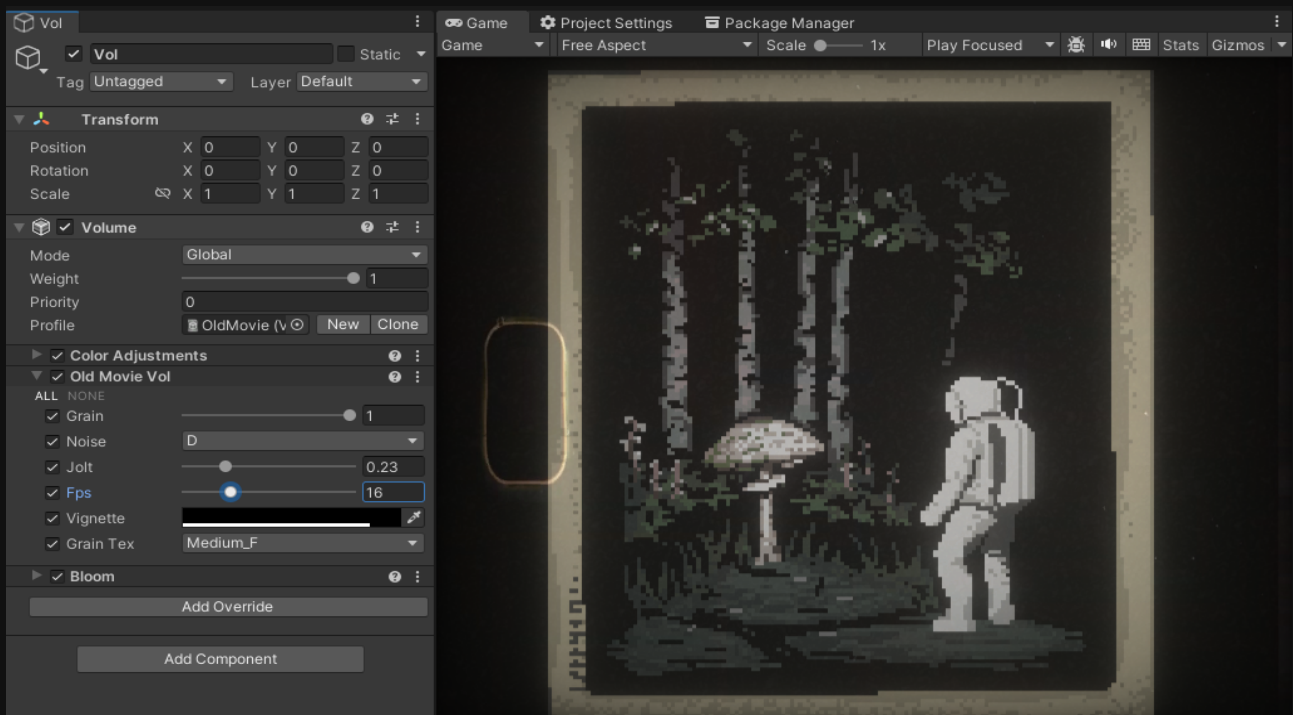

Add **OldMovieFx** render feature to
UrpRenderer

* note that UrpAsset can be overridden by
Unity QualitySettings

Render feature contains general settings like
flickering range, default fps, vignette power etc.

Configure OldMovie settings via VolumeProfile

The effect consists of several stages: **grain**, **noise texture**, **frame jolt**, **vignette**.

With embedded color adjustments and bloom effect, different stylization types can be achieved.
